

Increase Production While Reducing Material Cost with Performance Enhanced Milling Burs.

Manufactured for use in Roland dental mills, SS White® milling burs offer greater durability and milling efficiency on zirconia, PMMA and wax versus competitors burs. Precision milling minimizes remakes and reduces milling costs.

- Proprietary diamond coating produces a longer lasting milling bur which reduces cost per use
- Enhanced blade design creates a sharper cutting instrument and produces a superior surface finish
- Efficient chip removal and polished blades provide bur-free, clean milling results
- Sold in packs of 1 ea.

Of the many brands of milling burs we have used, we are beyond impressed with the results we have seen with SS White milling burs. None of the competitors have come close to the performance we are achieving and at a fraction of the cost!
